

HiSKY delivers private, sovereign satellite networks that keep critical platforms connected and in command - anywhere, under any conditions.

Space Control (NMS)

Network Management System

The HiSKY Space Control Network Management System (NMS) is a comprehensive, on-premises toolset for monitoring, configuration, administration, and analysis of the HiSKY SmartLITE System. It ensures simple and efficient operation of the full SmartLITE/ForceLITE system through a user-friendly interface and robust functionality with no reliance on external services or cloud infrastructure.

HSK_NMS_002

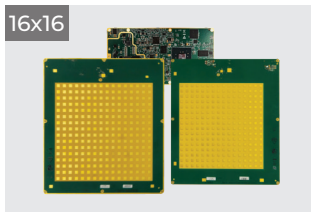

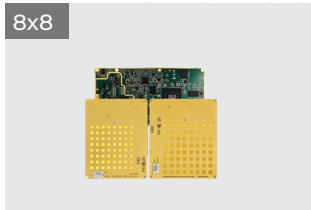

The Space Control NMS enables real-time monitoring and control of all SmartLITE/ForceLITE elements, including operational and maintenance functions.

Delivered as a 1U turnkey server appliance, it supports up to 50 HUB-Processors and 500 terminals in the standard version:

- Real-Time Monitoring & Control
- Centralized lifecycle control and management of system elements, terminals and HUB-Processors
- Real-time monitoring and control of telemetry and traffic data
- Live visibility into status of all system elements, channels and network
- Channel and link configuration – create and define satellite channels, and set up modem parameters
- Collection of system logs, history and network data for analysis

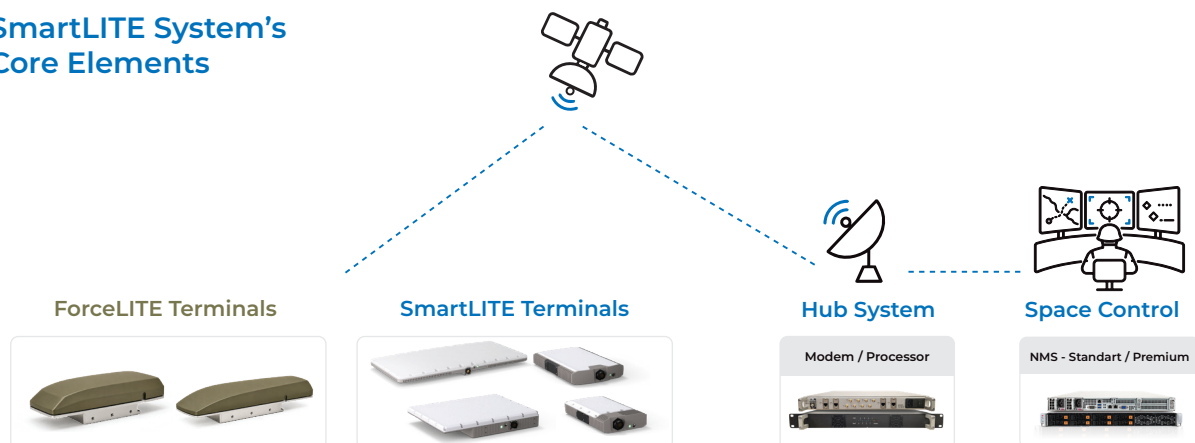

SmartLITE/ForceLITE System

The SmartLITE/ForceLITE System enables to establish a private, sovereign network architecture while choosing the right terminal, suited for your platform, from small UAVs to loitering munitions and long-range manned systems.

- Low Size, Weight, and Power (SWaP)
- End to End System - connect HQ to all your platforms
- Sovereign Network capability
- Private Network - complete control and security of all data transmissions
- Low Probability of Detection, Low Probability of Interception
- Proven operational track record
- Customized Integration for various platforms
